This is a neat little game, albeit short. I recommend this on sale. It has a solidly spooky atmosphere. I didn't find myself to be really scared at all and kinda laughed every time the 'ghost' would show up. The puzzles ranged from obvious to really tough. I needed to watch a walkthrough to solve 3 of them. The graphics and sound are good. Voice acting and music are good as well. I really enjoyed the story. For a one person job, I think that the effort was stellar. I also really appreciate having achievements to chase after. There is a LOT of backtracking so I wish that I was able to run. I also feel like the spelling and grammar could use a bit more polish. I was able to understand what was being said, so it wasn't undecipherable. Just has a bit of room for improvement. I would have also liked to play on a higher resolution. That's all I have to say. Thanks and good job to the Dev! I look forward to seeing more games from you.. Bought the game since it had 60 reviews and 100% Positive yet when i scrolled down i realized that wasnt so true and after play for a few mins it was a puzzle game and i had that just scare me you. My favorite part of this game is the dialog. Nothing sets the mood like a robotic voice and broken English. Other than that, the game is pretty amusing.. Very amazing it was done totally by one person! Pros: Impressive graphics, especially considering it was made entirely by one person. Interesting soundtrack. Spooky! Could probably easily be adapted into a VR game. Fun hidden achievements, and some of the clues and hidden objects are actually tricky. Unexpected jump scares the tree theme is interesting Cons: The English isn't great. It could of used more proofing. Capital letters, proper tense, and grammar structure were all missing quite a bit. Controls are a bit glitchy, it can take a few tries to interact with something. No zoom function - which can be tricky for noticing the tiny clues. Visually very dark- so it's hard to see some things. A lot of the tasks are glitchy. You'll do the correct thing and it wont work. But then you re-enter the space, and it works. A lot of the tasks require you to walk away and come back. For instance, a locked door makes you think you're stuck in a room. but then you walk away, come back, and the door breaks It seems like this takes place in the 80s but the costumes on the characters are all victoria era? Some of the mini games you'll have the answer correct and it wont work unless you save, exit, and relaunch If you save and come back to the game you aren't always where you left off Quite repetitive, going through the same rooms over and over again There is a journal of sorts but it only gets a few entries. It would be great if it told you your objectives when you're stuck, otherwise there's no real use to it. Some of the puzzles I had to look on here to find the answer. I am still not sure how you would find the answer without help. Even though my list of cons is long, I actually think this game has a LOT of potential, and I enjoyed playing it. I Am impressed with the developer and hope they continue to put out games. This was better than a lot of games that have full teams.. So, to start this is a very short game. the fact that one person did this was pretty cool. the game had nice detail in the objects around the house. i enjoyed the story plot. there were a couple of jump scares in the game that pleased me. not sure i really liked the fact that there was pretty much a set path during the exploration of the house and clues. i did get it on sale and i enjoyed the game for the price i paid.. So lets start with the negatives - there is not much in the way of options, there is an annoying headbob and mouse lag on your character, and the game is fairly shortish at a couple of hours long. Also the hotboxes to interact with items could be a little more generous. However the rest of the game is positive. The visuals and art are well done, the story and ambience are very good. Special mention must be made of the cinematography during the cutscenes - really a cut above the average. So the game is puzzle based, but for the most part the puzzles are easy enough and should not cause too many issues. And there is also the odd 'jump' scare moment. All in all for the money this game is well put together and worth the low cost if you like atmospheric horror or first person horror games.. I really liked the plot twist at the end. It was made by one person and it's really good for an indie horror game with only one person behind it.
